

Strategic Benefit Coverage Exclusions¹

This is a comprehensive list of medications currently not covered under the pharmacy benefit. We do not make the decision to exclude medications from benefit coverage lightly. A medication is only excluded when it offers no clinical value over other options in its class and its exclusion can be leveraged to achieve significant savings for our customers while preserving affordable choices for members. This medication is excluded for the majority of benefit plans. For customers not participating in exclusions or the Exclude at Launch Program, this medication is in the highest tier.

Reminder: Flex PDL packages are cumulative.
 Example: To see what exclusions exist for Plus Package, the Base, Standard, and Plus options must be elected from the drop down filter.

Updated 11/21/18

Medication Name	Brand and/or Generic ²	Therapeutic Use	Exclusion Rationale ³	Alternatives	Effective Date	Flex PDL Package	Access PDL Exclusions	Comments
Benzac, Desquam, Panoxyl, Brevoxyl	Brand & Generic	Acne	Legend Medication with OTC Equivalent	OTC benzoyl peroxide	1/1/2000	LMWOE Bolt-On Option	X

Percocet	Multi-Source Brand	Pain	Same active ingredient of therapeutic equivalent available by prescription	acetaminophen/oxycodone (generic Percocet)	7/1/2013	MSB Bolt-on Option	X	

Strategic Benefit Coverage Exclusions¹

This is a comprehensive list of medications currently not covered under the pharmacy benefit. We do not make the decision to exclude medications from benefit coverage lightly. A medication is only excluded when it offers no clinical value over other options in its class and its exclusion can be leveraged to achieve significant savings for our customers while preserving affordable choices for members. This medication is excluded for the majority of benefit plans. For customers not participating in exclusions or the Exclude at Launch Program, this medication is in the highest tier.

Reminder: Flex PDL packages are cumulative.
Example: To see what exclusions exist for Plus Package, the Base, Standard, and Plus options must be selected from the drop down filter.

Updated 11/21/18

Strategic Benefit Coverage Exclusions¹

This is a comprehensive list of medications currently not covered under the pharmacy benefit. We do not make the decision to exclude medications from benefit coverage lightly. A medication is only excluded when it offers no clinical value over other options in its class and its exclusion can be leveraged to achieve significant savings for our customers while preserving affordable choices for members. This medication is excluded for the majority of benefit plans. For customers not participating in exclusions or the Exclude at Launch Program, this medication is in the highest tier.

Reminder: Flex PDL packages are cumulative.
 Example: To see what exclusions exist for Plus Package, the Base, Standard, and Plus options must be elected from the drop down filter.

Rytary	Single Source Brand	Parkinson's Disease	Same active ingredient of therapeutic equivalent available by prescription	carbidopa/levodopa extended-release tablet (generic Sinemet CR), carbidopa/levodopa (generic Sinemet)	7/1/2016	Standard	X	

Strategic Benefit Coverage Exclusions¹

This is a comprehensive list of medications currently not covered under the pharmacy benefit. We do not make the decision to exclude medications from benefit coverage lightly. A medication is only excluded when it offers no clinical value over other options in its class and its exclusion can be leveraged to achieve significant savings for our customers while preserving affordable choices for members. This medication is excluded for the majority of benefit plans. For customers not participating in exclusions or the Exclude at Launch Program, this medication is in the highest tier.

Reminder: Flex PDL packages are cumulative.
 Example: To see what exclusions exist for Plus Package, the Base, Standard, and Plus options must be selected from the drop down filter.

Updated 11/21/18

Medication Name	Brand and/or Generic ²	Therapeutic Use	Exclusion Rationale ³	Alternatives	Effective Date	Flex PDL Package	Access PDL Exclusions	Comments
Tasmar	Multi-Source Brand	Parkinson's Disease	Same active ingredient of therapeutic equivalent available by prescription	tolcapone (generic Tasmar)	7/1/2016	MSB Bolt-on Option	X

Strategic Benefit Coverage Exclusions¹

This is a comprehensive list of medications currently not covered under the pharmacy benefit. We do not make the decision to exclude medications from benefit coverage lightly. A medication is only excluded when it offers no clinical value over other options in its class and its exclusion can be leveraged to achieve significant savings for our customers while preserving affordable choices for members. This medication is excluded for the majority of benefit plans. For customers not participating in exclusions or the Exclude at Launch Program, this medication is in the highest tier.

Reminder: Flex PDL packages are cumulative.
 Example: To see what exclusions exist for Plus Package, the Base, Standard, and Plus options must be elected from the drop down filter.

Updated 11/21/2018

Medication Name	Brand and/or Generic ²	Therapeutic Use	Exclusion Rationale ³	Alternatives	Effective Date	Flex PDL Package	Access PDL Exclusions	Comments
