

# TEXAS PURE PRO-BEDDING MIX

## Pro-Bedding Mix Uses

### Garden and Landscape Beds

Easy to use! No extra tilling needed. The work is already done for you. Just spread Texas Pure pro-bedding mix to the desired depth for your beds or fill to the depth of your raised bed frames (6 to 12 inches recommended). Then just plant your seeds or plants!

### Trees and Shrubs

The deeper or bigger a plant's root system will be, the less it should depend on your amending its planting soil. You should give annuals and perennials, vegetables, groundcovers and small shrubs the best possible soil preparation.

Larger shrubs and shade trees will soon outgrow the amended areas, so it isn't necessary to go to as much trouble for them. Just be careful to select plants that will grow in conditions of the native soil you provide for them.

### Potted Plants

Texas Pure pro-bedding mix is ready to use as a potting mixture for your plants. Just fill your pot and place your plants.

**To order Texas Pure products, contact the Environmental Waste Services Customer Service at (972) 769-4150 or pick up your product at one of our retail locations.**
