

# TEXAS PURE MULCH

## Mulching Benefits

- Prevents weed seeds from germinating
- Conserves water
- Prevent moisture fluctuations in the soil which can damage tender roots
- Protects plants from temperature extremes—both heat and cold, providing exceptional growing environment for landscape plantings.

The deeper and more established a plants root systems are the healthier and more disease and drought resistant your plants will be. The success of your landscape plantings depend on trees and shrubs receiving essential moisture and nutrients provided by amending planting soils with compost and mulch. Be sure to plant varieties of plants and shrubs that are recommended for your growing area.

Mulch Use	Thickness	Notes
Garden & Landscape Beds	3 to 6 inches	Weed area before applying mulch
Annuals & Perennials	1 to 3 inches	Best to spread mulch when 4 to 6 inches tall
Shrubs & Trees	2 to 3 inches	Avoid piling mulch against tree trunks
