#### Part 2. Description of Work

- **Type of Business:** (Circle one) New or Existing Tenant

- **Description of activity at this location:**
  - ☐ Interior Finish (C.O.)
  - ☐ New Construction
  - ☐ Shell Only
  - ☐ Number of Dwelling Units (for apartments)
  - ☐ Alteration/Remodel
  - ☐ Demolition
  - ☐ Additions
  - ☐ Other: ________________________

- **Describe the work:**

- **Valuation of work:**

- **Square footage (only work being performed):**

- **Gas required:** ☐ Y ☐ N
- **Electric:** ☐ Y ☐ N
- **Fire Alarm:** ☐ Y ☐ N
- **Fire Sprinklered:** ☐ Y ☐ N
- **RPZ Installation:** ☐ Y ☐ N

#### Part 3. Contractor

- **Address:**
- **City/State/Zip:**
- **Phone:**

FM624CG019 REV. 02/20/15
City of Plano

DBA Businessname: ____________________________
Address: ____________________________________

Please indicate by placing an X in the appropriate area with regard to your business (production/use/by products).

Police Department Approval Required

Sexually Oriented Business as defined in Chapter 17.5 of the Plano Code of Ordinances requires a permit from the Police Department. I acknowledge that it is my responsibility to comply with Chapter 17.5. A Certificate of Occupancy does not permit operation of a Sexually Oriented Business.

Fire Dept Plan Submittal *

- Fire Sprinkler System ♦
- Fire Sprinkler Underground Piping ♦
- Fire Alarm System ♦
- Sprinkler Monitoring System ♦
- Alternate Agent System ♦
- Smoke Control/Stair Pressurization ♦
- Fireworks ♦
- Liquid Nitrogen/Oxygen/Cryogenic Tank ♦
- Liquid Propane Gas
- High Piled Storage Layout/Rack Plan (Bales or loose combustible fibers. Commodity stored above 12’ 0” high. Tire or pallet storage over 5’0” high.)
- Flammable liquid storage tanks
- Hazardous Materials Inventory Statement (Required for storage or use of Hazardous Materials)
- Fixed Extinguishing System (Inspection Only, no submittal required)
- Emergency Generator Test Report (Submitted after installation and testing)

* Requires Fire Department Review of Design Documents Submit plans directly to Fire Dept. For all Fire Dept. Plan Submittals

*No plans required for CO Permits

Health Inspections

- Alcoholic Beverages
- Carpet Cleaning Ops.
- Car Washes/Sand Trap/Oil Separator
- Electronic Assemblies
- Gold Platers
- Jewelry Fabrication & Repair
- Landscape/Nurseries
- Machine Shop
- Metal Forming
- Oil & Lube Shop/Sand Trap/
- Outside/Open storage of equipment
- Material or Commodities
- Pesticide Formulations
- Photo Processing
- Plastic Extrusions
- Power Wash System
- Restoration System
- Tattoo Parlor/Permanent Cosmetics
- Towers/Cooling Systems
- Vending Shops
- X-Ray Processes

Animal Services

- Animal Establishment (such as boarding facilities, pet stores, or grooming shops but not veterinary clinics)

Projects Requiring Health Plan Submittal Reviews (Excluding C.O. Permits)

Please indicate by placing an “X” in the area that applies

Any items in this area require plans to be inter-officed to the Health Department.

This is not an all exclusive list possibly other establishments may also be in need of a Health review.

- All Day Cares (Including Church Day Cares)
- All Schools (Exception classrooms & gymnasiums)
- All Churches and Hospitals (Exception kitchens not being affected by construction)
- Convenient Stores (7-11, beer stores, candy stores, dollar stores)
- All food for public consumption (including free food, pre-packaged food, vitamin stores, coffee stores, restaurants)

Exceptions:
- Private Residences
- Baby Showers
- Employee Break rooms
- Mother’s day out where only juice and crackers are served
- Vending Machines

</tbody>
</table>
** Situations which are not covered in the Table above shall be evaluated on a case-by-case basis by the City, and the required backflow prevention assembly shall be determined by the Utility Operations Superintendent (see reverse side).

Mainline; Reduced Pressure Backflow Assembly or Air Gap only. No closer than 3 ft from meter & no tee’s or branches before assembly isolation; Backflow Assembly to be installed at point of water connection to eq.

R.P.Z.-Reduced Pressure Backflow Assembly (Assembly required to be tested – see reverse side) A.V.B.-Atmospheric Vacuum Breaker
D.C.- Double check Valve Backflow Assembly (Assembly required to be tested- see reverse side) Air Gap-A separation of 1-inch minimum or twice the diameter of the pipe whichever
P.V.B’s can have a downstream shut-off valve is greater
A.V.B’s are not allowed in any Health situation and no downstream shut-off valves. No Vacuum Breaker shall be subjected to any type of backpressure situation.
Spill Proof Vacuum Breakers are not allowed in Plano

** REGISTRATION:** Prior to performing any testing of backflow prevention assemblies within the City of Plano, a licensed backflow prevention assembly technician must be registered with the City of Plano Utility Operations Department.

**TESTING OF BACKFLOW PREVENTION ASSEMBLIES:** The backflow prevention assemblies shall be tested by a Plano BPAT. In order to properly register a backflow prevention assembly with the City of Plano, a City of Plano Backflow Prevention Assembly Test Report form shall be completed by a Plano BPAT on each backflow prevention assembly tested. Each completed original form, together with the records of such tests, repairs, or replacement, shall be received by the Utility Operations Department of the City of Plano within ten (10) calendar days after the testing, repair, replacement or work performed upstream of the assembly.

**BACKFLOW PREVENTION ASSEMBLIES REQUIRED:**
(a) Each service connection from the public water system to premises having an auxiliary water supply shall be protected against backflow of water from the premises into the public water system with a Reduced Pressure Backflow Prevention Assembly.
(b) For all newly constructed premises on which persons handle process water and waters originating from the public water system, which have been subjected to deterioration in sanitary quality.
(c) Each service connection from the public water system to premises having an auxiliary water supply shall be protected against the backflow of water from the premises into the public water system upon the determination of the Superintendent. This requirement shall apply to each premise on which persons handle process waters and waters originating from the public water system, which have been subjected to deterioration in sanitary quality.
(d) Backflow prevention assemblies shall be installed on a service connection to premises: (1) having internal cross-connections that cannot be permanently corrected and controlled, (2) upon the appropriate City official’s determination that an intricate plumbing and piping arrangement exists which makes it impractical to ascertain whether cross-connections therein, or (3) where a portion of the Premises cannot be readily corrected and controlled, making it impractical or impossible to ascertain whether cross-connections exist. The customer connected to the public potable water system shall make all necessary arrangements, at its sole expense, to remove without delay security barriers or other obstacles to access by the Superintendent.
(e) If an interstreet main flow may result from two or more services supplying water to the same building, structure, or premises, then a standard check valve shall be installed adjacent to the respective meters and on the owner’s property. If a check valve is not adequate to protect the public water system’s mains from pollution or contamination, the installation of an approved backflow prevention assembly may be required by the Utility Operations Superintendent. Approval will be given if a backflow prevention assembly is functioning. A determination by the Utility Operations Superintendent, Building Official, or their respective designee(s) that a check valve is inadequate or that an approved backflow prevention assembly is required may be appealed.
(f) Quick connect or hose-bib connections from irrigation lines shall required the installation of an RPZ.

For more information, contact the City of Plano Utility Operations Department.
