Mosquito Pools Test Positive for West Nile

The City of Plano reports two tests conducted of pools of mosquitoes in City traps has come back positive for the West Nile virus. The City will take proactive measures by spraying targeted locations in and around the area of the traps. Weather permitting, Plano Environmental Quality Division crews will spray tonight, Wednesday, July 15 beginning at 9:00 P.M. The targeted spray area is bordered by the following streets:

Site 14

North – Hedgecoxe/Crystal Creek Dr.
East – Robinson Rd
South – Quincy Ln.
West – Preston Rd

Site 10

North – Leathertop Dr.
East – Haun Trl/ Huntington Dr.
South - W. Park Blvd
West – Coit Rd.

Attached are maps of the two spray areas.

Residents are urged to ensure children and pets are indoors during the time of spraying. The City encourages citizens to follow common prevention practices: DRAIN standing water in and around your home and neighborhood. DRESS appropriately before going outdoors. DEET (N, N-diethyl-m-toluamide) is an ingredient to look for when purchasing insect repellent. The use of bug spray is recommended at all times, when outdoors, especially during the day.

At this time, the Centers for Disease Control (CDC) has no data to suggest that this new coronavirus or other similar coronaviruses are spread by mosquitoes or ticks. The main way that COVID-19 spreads is from person to person. See [How Coronavirus Spreads](#) for more information.

Citizens with concerns or questions can call the City of Plano Environmental Health and Sustainability Department at 972-941-7143.
