## Mosquito Spraying at Two Sites Delayed until Monday Evening

Mechanical issues prevented the spraying at two of the sites that would otherwise have been sprayed on Saturday evening. Plano Environmental Quality Division Crews were able to spray all of site 10. Site 13 and Site 14 will be sprayed tomorrow/Monday, August 10, starting at 9 pm.

The two remaining targeted spray areas are bordered by the following streets:

**Site 13:**

North: W Park Blvd. / Melvin  
East: Ventura Dr.  
South: W. Plano Pkwy/  
West: Mira Vista Blvd

**Site 14:**

North: Crystal Creek Dr.  
East: Robinson Rd.  
South: Quincy Ln.  
West: Preston Rd./ Hedgecoxe Rd.

***Attached are maps of the spray area.***

Residents are urged to ensure children and pets are indoors during the time of spraying. The City encourages citizens to follow common prevention practices: DRAIN standing water in and around your home and neighborhood. DRESS appropriately before going outdoors. DEET (N, N-diethyl-m-toluamide) is an ingredient to look for when purchasing insect repellent. The use of bug spray is recommended at all times, when outdoors, especially during the day.

At this time, the Centers for Disease Control (CDC) has no data to suggest that this new coronavirus or other similar coronaviruses are spread by mosquitoes or ticks. The main way that COVID-19 spreads is from person to person. See [How Coronavirus Spreads](#) for more information.
