   b. White trim for each shed will likely require 2 gallons of paint.
   c. Shed doors need to be scraped before painting
   d. If trim on bottom/corners of sheds can be repaired/replaced in a few spots, that would also be very appreciated.

   a. Paint or stain each bench; estimate 1-gallon of semi-transparent stain needed

Tools Needed:
- Garden gloves
- Paint brushes, rollers, stir sticks, trays, tape and disposable gloves

The 3 sheds are identical in size and design. They each have a metal door, 2 faux windows on 2 sides and no design elements on the back of the shed.

The request is for the sheds to be repainted. Keeping with the same / similar colors is preferred.

Should scrape tape off of door on shed 1 before painting.
A. Sheds 2 and 3

- The 3 sheds are identical in size and design. They each have a metal door, 2 faux windows on 2 sides and no design elements on the back of the shed.
- The request is for the sheds to be repainted. Keeping with the same / similar colors is preferred.
- Both sheds 2 and 3 have rust on the metal doors (should scrape and use primer before painting) and have deterioration of trim pieces, (may consider using bondo before painting) particularly at bottom, corners of sheds.

B. Benches

The 2 benches are identical. Would like them stained or painted. No preference on which. If painted, would like a neutral color.
